IT'S NOT THAT HARD TO WORK OUT HOW THE RONDO MAXIFRAME® SYSTEM CAN SAVE YOU TIME AND MONEY.

With the Rondo MAXiframe® External Wall Framing System, you can achieve increased performance capacity while using less product.

It's a simple, cost-effective system that's quick and easy to install and consists of two major profiles, MAXIjamb® and MAXItrack®. Together with three complementary cleats, they provide a simple, solid structure that not only outperforms typical boxed stud configuration, but also reduces the required number of noggings, saving both time and money.

The jamb stud, MAXIjamb®, can be used both as a vertical jamb member to openings, or as a horizontal head or sill member in window openings.

This reduces the necessity for multiple stud configurations, such as boxed or back to back.

The MAXiframe® system also integrates Rondo's MAXItrack®, a slotted deflection head track which offers increased capacity at the head connection, allowing studs to be screw-fixed to the track, reducing the need for stud realignment after other trades have put through their services, and eliminating the need to install an additional nogging directly below the head track – providing both labour and material cost savings. For more information, visit www.rondo.com.au or contact your Rondo Sales Office on 1300 36 RONDO (1300 36 7663).

why compromise?
